CHINA IN FEAR JAPAN IS TO PRESS DEMANDS

Little Hope Entertained That Western Powers Would Interfere Actively.

Correspondence of the Associated Press.
PEKING, October 23.—Recent utterances of Baron Ishii, Japan's new minister of foreign affairs, concerning the unsettled conditions in China and the repeated statements of Japanese newspapers about the necessity for the preservation of peace in China have caused much uneasiness and apprehension in Peking.
Repeated rumors that Japan has received the demands made under group V and its ultimatum of May 7 add to the general unrest in China and afford food for the campaign which is being waged by opponents of the monarchial movement.
In a recent article the Tokio Daily Yamanote states that Baron Ishii will have a far better defined foreign policy than his predecessor, and is expected to improve the foreign relations with Japan by some striking diplomatic strokes.

Fears for China's Future.
Commenting on this, the Peking Gazette says:
"If strokes more striking than those delivered by Mr. Ishii at the command of Baron Kato, and which spread the brilliant harvest of the Japanese demands, are expected, then God help the coming empire in China!"
The demands made by Japan under group V, all of which are now held in Peking, are the end of all Chinese. Constant references are made to them in the newspapers printed in China, and they are being discussed in the Japanese press. Under this group there are seven articles. The first provides that the Chinese government shall first be consulted in all matters of international relations, political, financial and military affairs. Article 2 empowers Japanese consuls, churches and schools to own land in the interior of China. Under the third article Japan seeks to obtain administration of the Chinese of the police department in important Chinese cities.

War Munitions From Japan.
The fourth article stipulates that China shall buy at least 50 per cent of its munitions of war from Japan, and shall employ Japanese technical experts in an arsenal operated jointly in China by Chinese and Japanese. The fifth article demands the right to construct important railways in the Yangtze valley. Article 6 stipulates that when China needs foreign capital to construct public works in the province of Fukien, Japan shall have the right of preference. Article 7 stipulates that Japanese subjects shall have the right of missionary propaganda in China.
President Yuan Shi-kai and his advisers protested vigorously against the group, which was kept secret for some time, declaring that these demands "were not proper subjects for international negotiations, conflicting, as they did, with the sovereign rights of China, the treaty rights of other powers and the principle of equal opportunity."
Supporters of the republican form of government are frank in their charge that President Yuan Shi-kai is putting China, clearly at the mercy of Japan by risking the change to a monarchy at a time when the worst powers are engaged in a struggle which will make foreign interference in far eastern politics unlikely.

STUDY OF SCHOOL METHODS.

Eighty Mexican Teachers in Washington Seeking Information.
Practically the entire party of eighty Mexican school teachers and officials who are visiting Washington spent several hours today at the Wilson Normal School studying the various methods of instruction employed there. Miss Goding, principal of the school, explained the work being done by the various classes to the visitors.

The visiting teachers and officials had lunch in the luncheon at the school, and this afternoon they are visiting Mount Vernon. Tomorrow they are planning to visit McKinley Manual Training School. They leave for Philadelphia tomorrow evening.
The party was welcomed to a public reception at the Mexican embassy by Emilio Arredondo, confidential representative of the Carranza government in Washington. In the evening they attended the Marine Band concert at the Belasco Theater.
